

 **VELOCITY**
HOSPITALITY
SOLUTIONS. PERIOD.

About Us

The mission of Velocity Hospitality is to streamline processes in getting clients the most competitively priced durable product in the market quickly. We are direct suppliers of guest room seating and case goods

Our manufacturing plants have worked extremely hard to align ourselves for success in brand specific and independent designs equally. We focus on providing quality customer service to all our clients.

Manufacturing Solutions

The company quickly gained a reputation for being customer focused and for producing high quality hospitality furniture. From our modest beginnings our manufacturing plant has grown significantly. Today our facilities span 400,000sq.ft. of permanent manufacturing capacity and 300,000 sq. ft. of flex manufacturing housing 6 CNC machines, panel saws, edge banders, multiple metal shops, an expansive powder coating line, wet paint facilities and over 40 loading docks.

More importantly we've invested in our IT infrastructure installing secure wireless communications throughout our manufacturing facility. As jobs progress through production they're tracked at every phase of the manufacturing process where the information is updated in real time.

Additionally, Velocity offers customers the option to customize their property to bring their vision to life. We handle the installation with our own install teams.

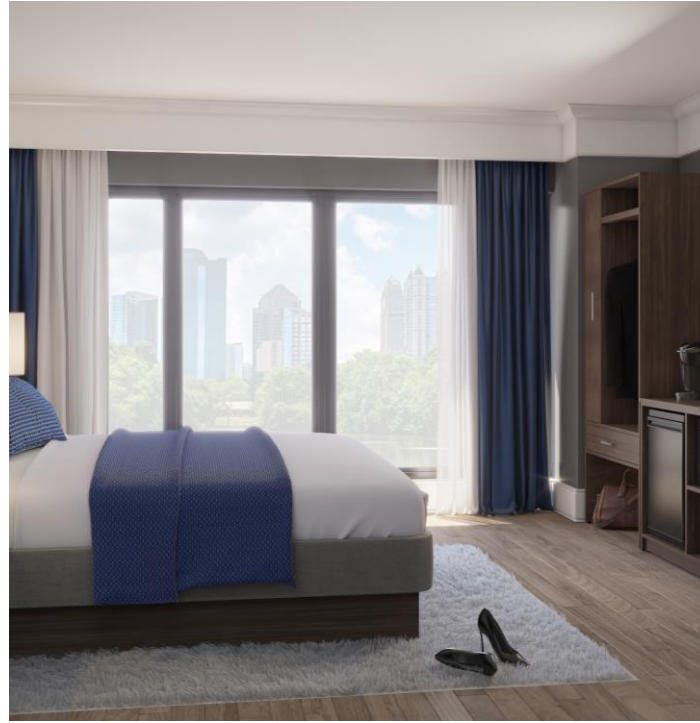

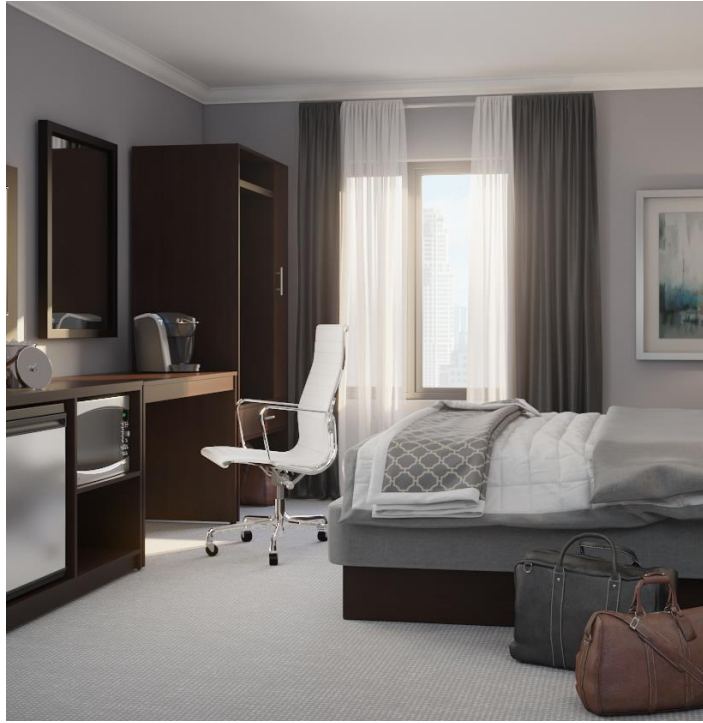

Hospitality

Having the capabilities to react to the needs of an ever-changing Hospitality environment has been one of the keys to our long-term success.

Velocity's ability to meet and exceed expectations on any size job is just another way that we distinguish ourselves in this industry. We have a dedicated Hospitality division with experience working with franchisees and directly with corporate.

Our casegoods and seating are manufactured domestically, shortening the lead time and avoiding the complications of transporting products overseas. We have serviced brands such as Comfort Inn, Comfort Suites, Sleep Inn, Quality Inn, Hampton Inn, and many more!

Custom

Aside from brand standard programs, Velocity also has the capability to provide custom casegood packages in a variety of finishes.

Our independent line of casegoods can be used in any custom brand design and in independent/boutique hotels.

When our custom design and engineering teams engage on a project they're challenged to look beyond the obvious solutions. This approach helps to foster a creative and innovative culture that permeates throughout our company.

Millwork

Velocity can also provide Millwork to the Hospitality industry and beyond. We service apartment communities, student housing facilities, hotels, and retirement homes.

With our ability to manufacture and install, we can be your single stop solution. We have the capability, capacity, and creativity to solve any of your millwork and cabinetry needs. Through clever design, smart engineering, and state of the art manufacturing, Velocity is here to save you and your team time and money.

Installation

Velocity offers complete end-to-end furniture solutions by offering our own national installation services. Our installation company is strategically located near our main manufacturing operations to provide guidance on optimal installation methods meant to reduce shipping and installation costs for our customers.

Operating out of a 150,000 sq. ft. facility, we can employ over 100 skilled furniture and cabinetry resources to stage furniture allowing for rapid in-field deployment often taking weeks off install timelines. Our ability to design furniture that can be rapidly deployed allows our customers the ability to turn their properties over to operations faster to begin generating revenues. By utilizing the services of our team, we have the capability to accelerate your ROI.
